

Reusable Roof Anchor
Part # FS870

Instructions For Use:

- Inspect all anchor points prior to use for damage and/or deformations. Attach only to structure member or material that will support 5000 lbs.
- When attaching to wood truss over sheathing, center row holes of both sides must be secured by 2" x #8 wood screws or equal. If attaching only to wood sheathing, all holes must be filled with 2" x #8 wood screws or equal.
- When attaching to steel roofs a minimum of 10 #8, 3/4" metal screws or equal must be placed in each side of the anchor. Unit may be installed at pitch angles or flat with both plates resting on roof surface in opposite directions.

WARNING!

1. Always follow all instructions supplied with equipment.
2. Examine before each use.
3. Discard if damaged in a fall.
4. Must use in accordance with all ANSI & OSHA requirements.
5. Failure to read and follow these instructions could result in serious injury or death.

Meets OSHA 1926-502, ANSI Z359.1-2007, ANSI A10.32 2004
