For Scaffolders By Scaffolders

An Exclusive U.S.A. MonZon Rental and Installation Partnership

INDUSTRY-LEADING WEATHER PROTECTION

We are proud to offer MonZon's PROTECT IT™ aluminum weather protection system for rental or sale. This revolutionary product will keep employees safe and protect your project from the elements while cutting unwanted costs associated with safety incidents or downtime.

SAFETY INCLUDES WEATHER PROTECTION

Scaffold professionals need safe, reliable weather protection systems as requirements for protected construction and maintenance work increase. MonZon's PROTECT IT™ system fits the bill - and it's designed to fit any scaffold system.

The PROTECT IT™ system is light, flexible and strong, improving ergonomic and environmental aspects with no compromises on safety. The end results? Reduced downtime and costs for contractors, and uncompromised protection from rain, snow and wind.

For over 90 years, APi Construction has operated under the premise that our employees are the organizations' most valued assets. Our commitment to job site safety is the essence of how we perform our best and safest projects. Adding MonZon's PROTECT IT™ system to our scaffold division's product lineup underscores the importance of safety to our company, our team and our projects.

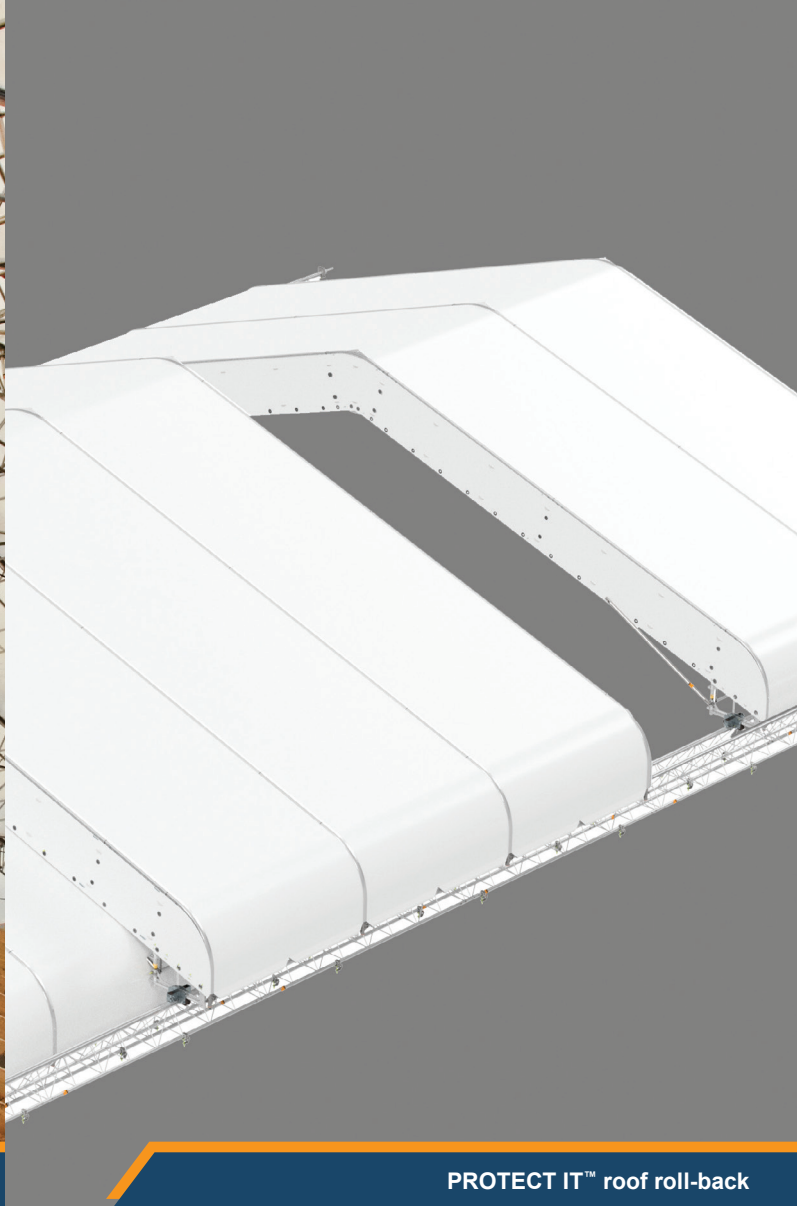

We believe that zero injuries is achievable for any project, and protecting health and safety is the expectation of the entire APi family of companies.

KEY FEATURES

- Free span up to 165'
- Lightweight
- 100% aluminum
- Easily movable
- Intuitive assembly
- Few components
- Electric motors

PROTECT IT™ aluminum weather protection system

PROTECT IT™ roof roll-back

SAVE TIME

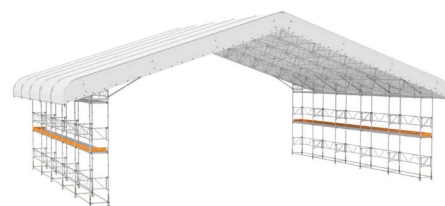

With a smart aluminum design and intuitive assembly, PROTECT IT™ exceeds the competition in simple assembly, effective storage and minimal transport needs. With very few components and beams available in a variety of lengths, installation is fast, flexible and easy for any project.

SPAN FAR

Like nothing else on the market, PROTECT IT™ delivers and guarantees a free span of up to 165', covering even the largest projects with ease. Limit project downtime and increase productivity with protection from the elements.

WORK EFFICIENTLY

PROTECT IT™ was designed to be flexible, so it works on any job site. Innovative Keder Tarpaulins in the unbraced bays can be removed quickly so machinery or other bulky loads can be craned into place easily.
